

ZIRMED PREDICTIVE ANALYTICS SOLUTIONS

Integrate the data from all your patient accounting and clinical systems—and extract actionable insights to optimize your revenue cycle and manage population health.

Unlock the power hidden in your data.

ZirMed is the only company in revenue cycle management leveraging predictive analytics to help hospitals and healthcare systems find hidden income and reduce A/R days and write-offs.

“ZirMed’s solution provided us with the analytics to drive process improvement and education across our facilities and departments.”

—Catholic Health Initiatives

Our cloud-based solutions provide the platform for data integration of all your patient accounting and clinical systems. ZirMed’s advanced analytics technology uses your own data to identify unique trends, find key information, and extract actionable insights to improve your revenue cycle and support population health management.

Take advantage of our robust workflow and real-time predictive modeling to improve patient access, charge integrity, and reimbursement—and accurately estimate the health and financial risk of your patient populations. Our data-driven methodology delivers greater revenue, reduces costs, and arms your healthcare enterprise with the intelligence to make strategic, proactive decisions that lead to greater value.

ZirMed’s Predictive Analytics solutions cover the entire revenue cycle from your front office to your back office, and include:

Patient Access Solutions:

- Pre-Registration
- Insurance Verification
- Financial Counseling
- Point-of-Service Collections

Reimbursement Solutions:

- A/R Management
- Denial Management
- Underpayment Recovery
- Self-Pay Analytics
- Contract Management

Charge Integrity Solutions:

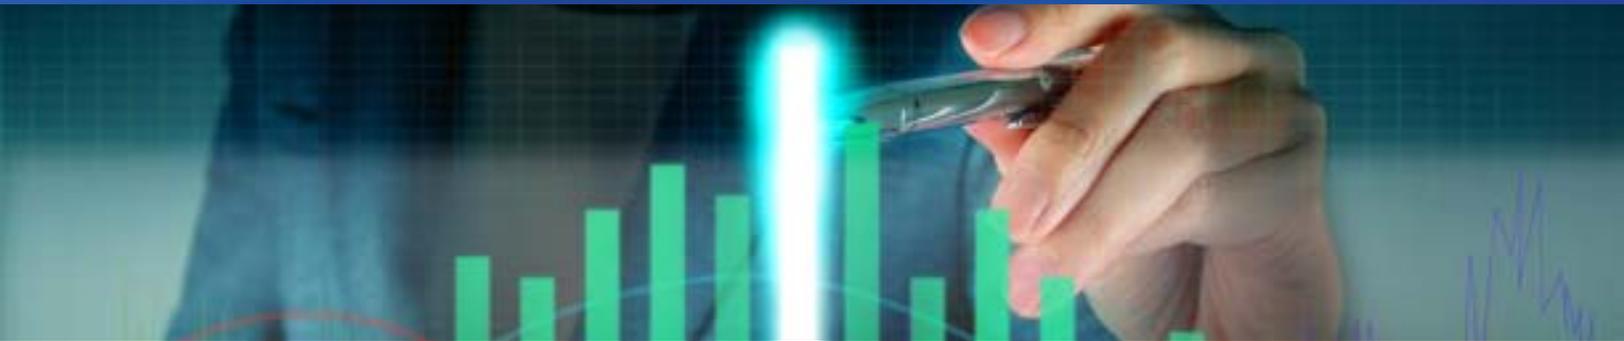

- Missing Charges
- Coding Variance
- Overcharging Detection

“The solution helped us view our data and work in ways we had been dreaming about for years.”

—Large hospital system

Population Health Solutions

- Readmission Analytics
- Physician Analytics
- Patient Analytics
- Safety & Quality Analytics

THE RIGHT TECHNOLOGY.

Say “no” to expensive, hard-to-use software. ZirMed’s solutions don’t require new hardware or locally installed software, and are customized to meet your organization’s needs. Our analytics delve deep into your patient billing and clinical data for maximum financial and operational benefit.

THE RIGHT ANALYTICS.

Find out why ZirMed’s solutions are used by some of the largest health systems across the US—and why they’ve repeatedly won HFMA case study contests. We’re experts in centralizing disparate data to deliver high-quality, accurate, and easy-to-use analytics that create sustainable efficiencies and extract actionable insights from data so your organization can deliver greater value.

THE RIGHT PARTNER.

Enterprise healthcare clients from coast to coast trust ZirMed for award-winning solutions and support. Our implementation team will work with your organization to configure your workflows, dashboards, and real-time reports to address your specific needs and yield the greatest benefits. And we never outsource phone support—our team of full-time experts works right here in our US facilities.
